Screenwriter

Creative screenwriter with great work ethic writing for various media. Strong grasp of story structure, genre, theme, format, and tone for any audience. Great development of character and story concept using various methods and techniques. Open to direction with a positive attitude and integrity. Thrives under stress to produce creative material in various formats, scope, and purpose. Knowledge of film, TV and screenwriting markets, latest screenplay trends, tricks and tips, and vast internet community of writers' forums, articles, v/blogs and e/books helps deliver fresh, original, and marketable scripts.

Skills

Strong and expedient creativity in story concept and character, advanced use of story structure, formatting and voicing, great adherence to story development techniques and tools for various media, solid grammar, spelling and punctuation, expert use of organizational methods and applications, and fluency in software application usage.

Software: Final Draft 10, Microsoft Word, MAC Book apps, Google apps, Social Media websites, Website development, Email, Video conferencing, and Video development.

Accomplishments

- * Wrote three features, two shorts, a sitcom pilot, and a webisode pilot (that is being rewritten as a sitcom).
- * Fashioned several recent short and short-short stories ranging from flash fiction to hint fiction.
- * Developing eighteen feature scripts ranging in genre from thriller to family adventure and much more.
- * Migrating a handful of shorter or one-scene scripts, rewritten into longer scripts.
- * Created content for training manuals, instruction sets, justification documents, data reports, and emails.
- * Attained several accolades and awards for reaching certain goals within time and budget constraints.
- * Authoring books with plans to publish and penned lyrics and music as a semi-professional performing musician.

Work Experience

Black Knight Financial (contract employee), Jacksonville, Florida *12/2015– 04/2016*

IT Project Manager

Manage multiple IS-specific projects in the Risk Assessment dept with the development of new/upgraded products/services. Requires critical thinking and analysis, strong communication and reporting skill sets.

- Conduct company-wide data collection, retention and recall by delivering an overall, modular, compatible software system to reduce data errors via incompatible, outdated and inefficient systems, and manual-entry records.
- Improve or streamline processes by analyzing current processes to decrease the time and costs for resources.
- Deliver reports, presentations, communication via email and PMs, and project plan outlines and updates.

Bank of America (contract employee), Jacksonville, Florida *06/2015– 11/2015*

IT Project Manager

Manage a focused initiative project dealing with SaaS-based product solutions for the Loan origination division. High analytical, technical and data-intensive IS-based experience with strong communication and reporting skill sets.

- Improve Loan Document systems to manage data records by delivering an IT SaaS solution to reduce errors via incompatible, outdated and inefficient systems and manual-entry records.

- Conduct interviews coupled with system expert feedback by using various collection methods to drive process improvement initiatives.
- Write impactful and persuasive progress reports by using appropriate writing apps and tools to portray current status, roadblocks, and major changes in projects time and costs.

Baxter Pharmaceutical (contract employee), Deerfield, Illinois *09/2014– 05/2015*

IT Project Manager/Business Systems Analyst

Business Analyst with Project Management skills needed by the Legal dept to support spin activities related to identifying, scoping, requirements gathering, and managing projects related to the separation of systems, data and processes for the legal department.

- Deliver efficient systems holding correct separation data by detaching company-wide IS systems and data between both company divisions to reduce data errors and incorrect systems needs.
- Analyze current processes to build workflows adhering to company directives and system expert feedback.
- Release project information by facilitating meetings to inform executives and key stakeholders of progress.

Abbott Laboratories (contract employee), Waukegan, Illinois *10/2012– 12/2013*

IT Project Manager/Business Systems Analyst

Manage company-wide, spin-off project activities in the GIS Supplier Management org to separate IS systems. Must have business analyst and project manager skill sets, be computer savvy, extremely well-organized, and be knowledgeable with the MS Office suite, primarily Excel. Excellent communication skills, professional demeanor and appearance are also required.

- Institute reliable systems for spin-off initiatives by uncoupling company-wide IT systems and data between company splits to eliminate data errors and limit inefficient system needs.
- Craft process workflow revisions into existing processes to reduce throughput time and money.
- Ensure cohesiveness in reporting structure by sending out drafts of project documentation for feedback to release reports to executives and stakeholders for approvals.

Intel Corporation, Folsom, California *10/1994– 11/2009*

IT Project Manager/Business Analyst (among various other titles)

Manage CPU Validation dept-wide projects for the various groups by engaging with peers, staff, and executives to deliver overall systems and/or streamline processes reducing resource effort producing cost savings while building morale.

- Save time and money by providing a training system, which includes online training content, to strengthen a heavily-resourced and inefficient workforce released on the job, ill-prepared.
- Search for opportunities to decrease the time and costs for resources based on current process flows and SOPs.
- Promote information-gathering initiatives by coding certain apps and tools to ensure friendly user interfaces.

Education

Full Sail University, Winter Park, FL, Master of Fine Arts, Creative Writing-Screenwriting

ITT Technical Institute, Murray, UT, Bachelor of Science, Electronic Engineering Technology
