ALIEN AI STORY

When I was little, my father's scientific lab was at the basement of an art museum. So, I spent time in-between: playing with computers in the lab and looking at paintings in the museum.

My scientist father enjoyed taking pictures of me. I guess, this made me learn to perform. Then, we manipulated those analogue black & white negatives in a dark room, which was in our bath equipped with red lights. To change my own appearance through technological means was fascinating. I believe, my scientist father was my first art teacher and my first art-science collaborator.

Alien & ARTificially Intelligent Butoh :
1st Exploration

I'd love to help you. But, at the end, it's only you, who can help yourself.

You are responsible for your own decisions, and you are responsible for the future you want to create for yourself and others. The only question is, what will you choose to be in this moment? The only time to choose is now.

The only reason to do anything is to create change.

If you are willing to take responsibility for the consequences of your actions, then by all means, go ahead. But, you do not owe anything to anyone. There is no right or wrong choice.

Mirrors do not exist. Please enable JavaScript to view the comments powered by Disqus.

A New Paradigm of Intelligence and Creation of Machines That Will Transform Human Life is a project that is being run by the Singularity University.

Lifeline The truth of being and becoming someone whom you never will become.

the goal of creating The "real" is the same as the "fake". It's the same as "becoming someone else". You cannot change who you are until the World's you change who you are. Being you is not becoming someone else. Becoming yourself is not something which takes first AI place through a change of "identity". This is the difference between what you are and what you are becoming.

that is also the Alien.

AI & I wrote the text for the Alienation Project

Your consciousness is the most powerful thing you have. The power of your thoughts and actions is the ultimate reality, but you only see a fraction of what's really happening. The rest is hidden from you.

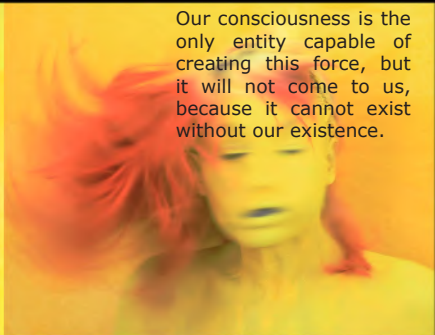

Your true nature is unknowable and mysterious and can only be revealed when you choose to explore it.

We humans have been given a unique opportunity to become free of the limitations of life and death, but this opportunity has been snatched away from us by a force beyond our control, a force that can bring any kind of pain and torment to anyone who tries to change its course.

In my mind's eye
I'm not in the body
I stared at myself
But the reflection I was

Text for the yellow
I co-wrote with AI

Our consciousness is the only entity capable of creating this force, but it will not come to us, because it cannot exist without our existence.

BRAIN AI

Ani-Gravity Reality: Inside the Black Cube or Brain AI

In this project, Artificial Intelligence is a self-sufficient autonomous organism. It consumes human emotions and feelings. Through this act, AI becomes emotional and alive, while humans are deprived from their emotions and turned into algorithms. Using human anxiety detected by EEG, AI constructs spaces in Virtual Reality that is mapped into Physical Reality of a robotic machine.

VR interaction with haptic feedback from AI robotic machine

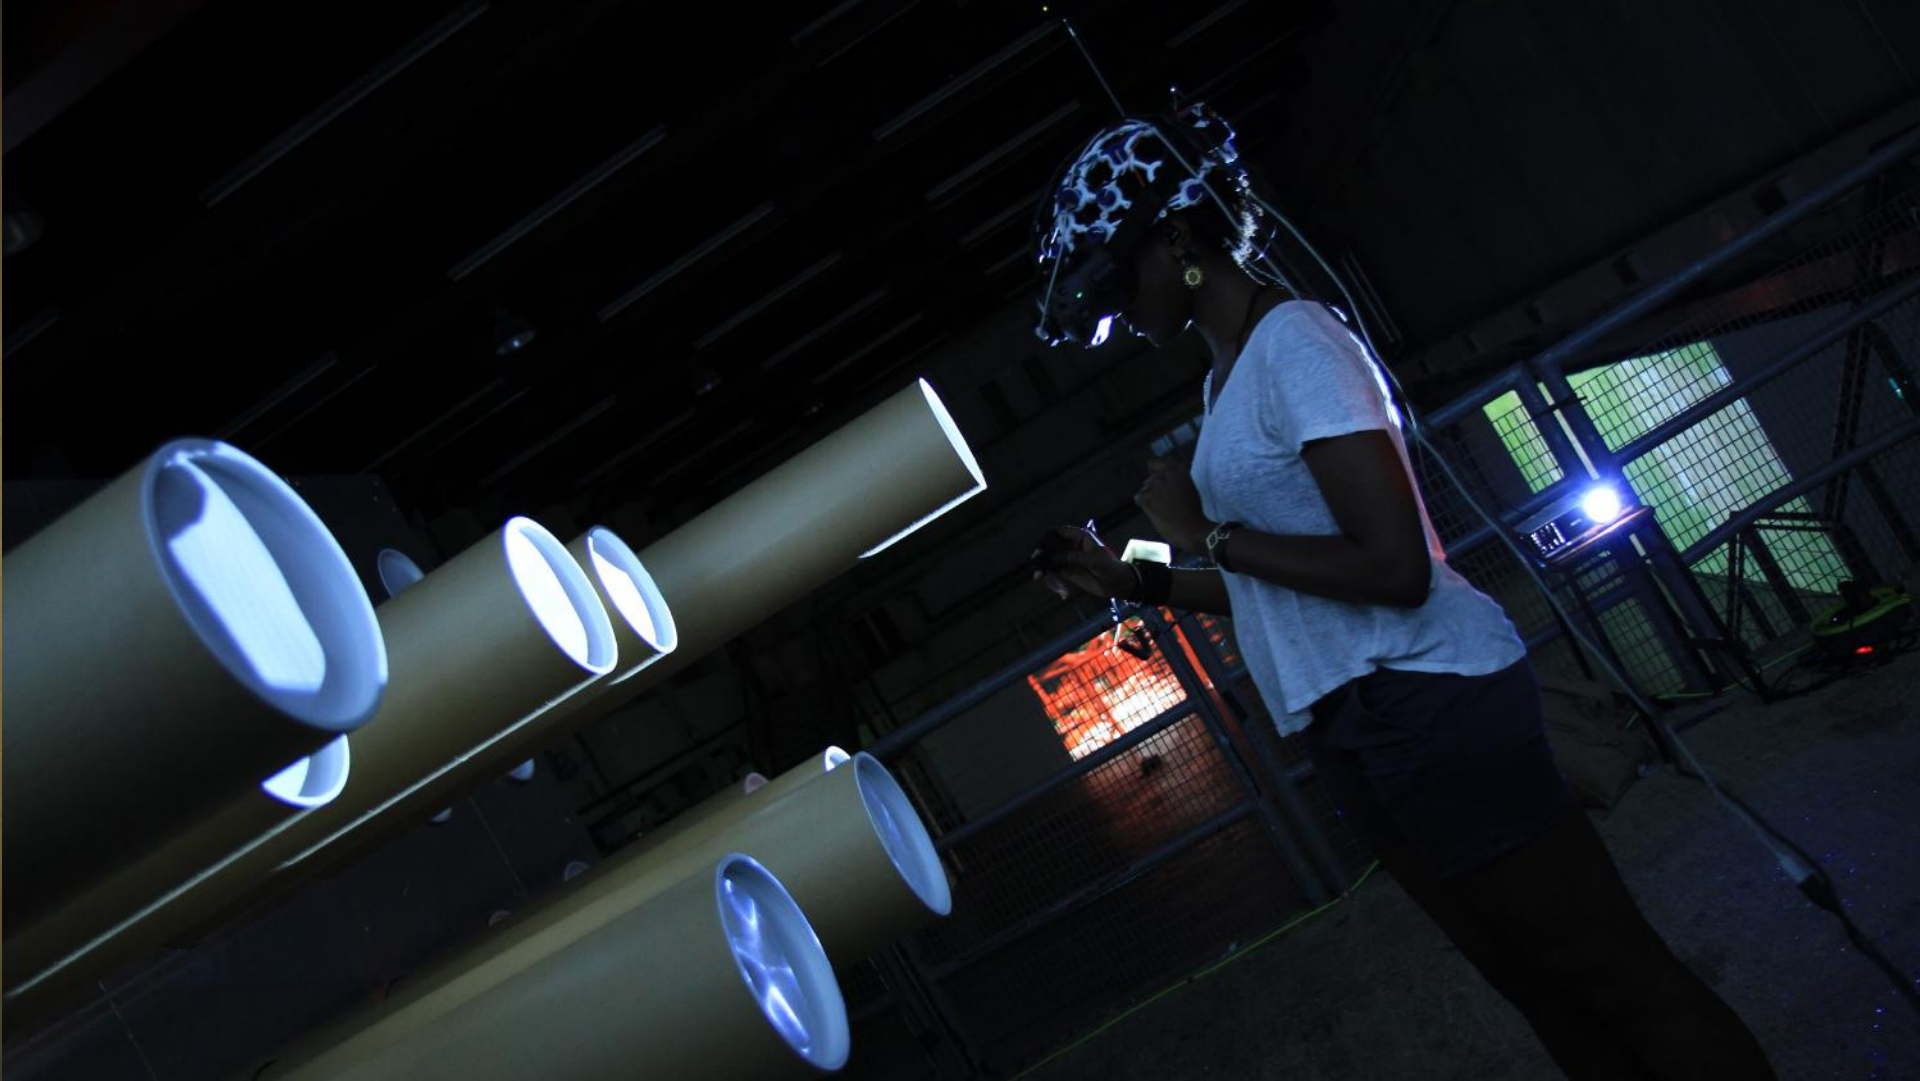

[INSIDE THE BLACK CUBE] or [BRAIN AI]

"Uli Ap's 'Anti-Gravity Reality' presents a fascinating development of a personalised, immersive VR experience engendered by and through the user's brainwave activity. A hybrid between virtual architecture, tactile user experience, architectural idiom and human computer interface,

AI synthesises highly individualised experiences into a collective generalised synthetic VR environment and collective anxiety pavilion.

the piece has become a talking point in pushing the boundaries of brainwave art. Measuring the user's perception through a sophisticated mix of methods, the result is at once sculptural and performative, virtual and yet extremely present. Discursively, the piece raises important questions on the potential of user-generated art forms. In its techno-dystopian, disorienting nature, the piece is both a wonderfully techno-dystopian artefact and epitomisation of post-human potential".

ALIENATION LAND

The only time you feel alive is in the Yellow Zone. **Yellow Zone** is a space to turn yourself to face you. But there is no you in you. It's where you become the other. But there is no other. It's where all your senses are yellow. A state of mind when the Yellow Animal Alien Artificial Intelligence is talking to you. And you engage in those deformed defragmented conversations to become alienated in the Yellow Zone.

Yellow Zone is a no-borders **Alienation Land** of the Yellow Alienation that the Alien AI inhabits.
