ONE AUTUMN EVENING,  
THE YOUNG HUSBAND RETURNS HOME.  
BUT WHEN HE GOES INSIDE,  
HE FINDS HIS WIFE LYING UNCONSCIOUS ON THE FLOOR...

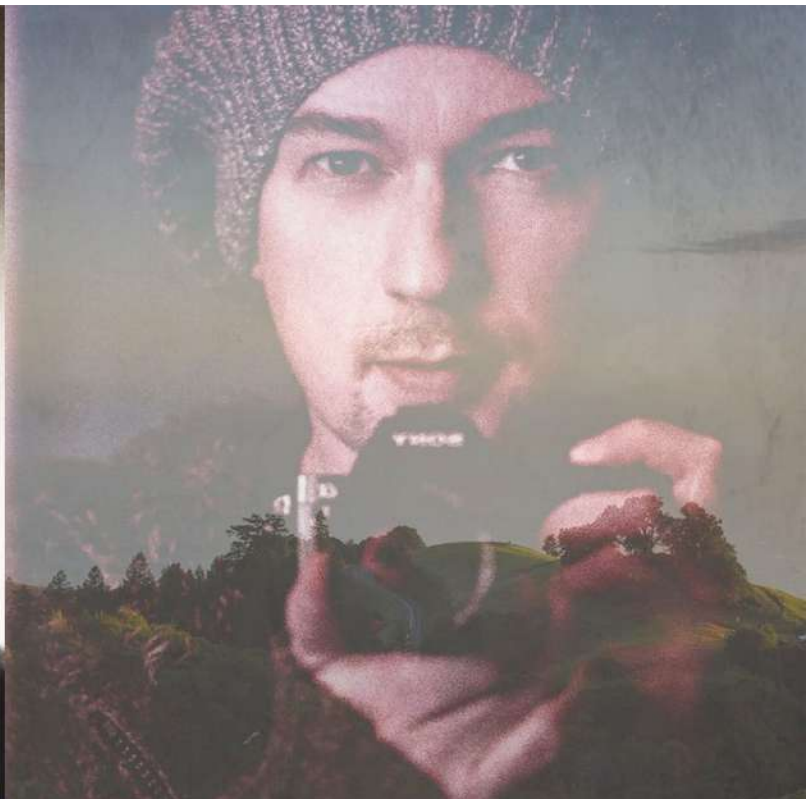

The idea of the film arose at the moment of making a decision - to order sushi by phone. The comic idea has transformed into a satirical genre story, where we can assume a near future in which artificial intelligence will be able to help by consulting human clients and in rather delicate moments. The basis of any original movie is a script with a certain degree of absurdity, neatly woven into a simple plot. The submission form is also important to me. I am a supporter that cinema should be a visual-auditory art picture. A full-fledged movie can be watched and listened to separately! I focus on the film language, as I believe that a good movie should be interesting to talk about.

Our film lays part of the foundation for future film work, as our other developments are somehow interconnected.

We want to make a great movie with interesting stories, reflecting, as well as on the cinema of the past, and analyzing the current agenda not only in our country. Despite the fact that we have developments on various topics, a satirical view of reality will be a cross-cutting genre, because in satire it is easier to perceive reality, which can often be completely unsightly.
