## Summary

As a certified and award-winning filmmaker with a background in civil engineering, I have a unique perspective on the art and science of video production. My passion for creating high-quality video content is matched only by my commitment to delivering outstanding results for my clients.

Throughout my career, I have gained extensive experience in all aspects of video production, from camera operation and lighting to post-production and editing. I am proficient in using industry-standard software such as DaVinci Resolve and Adobe Premiere Pro, and I am always eager to learn new techniques and technologies to stay at the forefront of my field.

In addition to my technical skills, I have strong project management and client communication skills, which I developed during my time as a Civil Engineer, Lecturer, and Site Reconnaissance Officer. I am adept at collaborating with clients to understand their needs and vision, and I am committed to delivering exceptional results on time and within budget.

My passion for filmmaking has led to numerous accomplishments, including winning the Best Student Film award at the 48 Hour Film Project. I am constantly seeking out new challenges and opportunities to push the boundaries of what is possible in video production.

If you are looking for a talented and dedicated filmmaker who can bring your vision to life, I would be thrilled to work with you. Let's connect and see how we can create something amazing together!
