Synopsis

In 1968, a young babysitter's evening is interrupted by strange and unsettling occurrences.

Rotary is a story that takes place in 1968, years after the brutal slaying of a young woman while she babysat in a small town of Galax, Virginia. The film picks up during the evening of May 18th, 1968, where Julie has just arrived to a last minute babysitting assignment for the Franklins. Over the course of the evening strange occurrences begin to happen, growing increasingly intense as Julie tries to make sense of the madness and what's to come.

This is a retelling and different take on the classic urban legend of "The babysitter and the man upstairs". The story is also inspired by true events -- loosely based on an actual unsolved murder case involving the tragic slaying of teenage girl, while she babysat in 1950.

Director's Bio

Lorenzo P. Adams is a writer, director, and producer based out of Washington, D.C. As a child he expressed himself through drawing and writing short stories that inspired him through his love for horror films. While studying Mass Communications and Journalism at West Virginia State University, he developed a strong passion for film. This passion combined with his love for the horror movie genre created an urge and calling to create the films that are inspired by his love for the genre. His goal is create films as a horror fan first, and filmmaker second. Influenced by the likes of Dario Argento, Alexander Aja, John Carpenter, and Alfred Hitchcock, Lorenzo is set to release his directorial debut, a horror-thriller short film titled "Rotary" in 2017. He also has plans to shoot his second short film "Take My Hand Mona Rae" later this year.

Director's Statement

I've always been infatuated with things of the macabre, things that terrify us as human beings and terrors that have a touch of reality. *Rotary* is based on my all time favorite urban legend, an urban legend that dates back to the 1950's. The babysitter and the man upstairs. This story in my opinion is one of the first kind of home invasion horrors that predate films like *The Strangers*, *Straw Dawgs*, and *Wait Until Dark*. It birthed the horrifying reveal that gave many of us nightmares and questions in our reality as to whether we were really safe within our own homes. Reality is one of the roots of true horror." I also was inspired by the thought of being the target of someone who means to harm you. The thought of being under attack for reasons unknown, this angle has always been effective in horror. Random attacks or what appear to be random with no motive are horrifying.
