He attended school & collage in Delhi, NCR. and developed his film making skills at AAFT, NOIDA.

Inspired by True life situations, this story is about a young Punjabi Girl, who is in love with a Muslim Boy struggling to convince his family for the marriage.

Dramatically she explores and comes to conclusion, when boy invites for a final meet with his family.

In these modern times, higher expectations in life leads to limited choices. Nisha (Preet) as Protagonist, performed at ease and brought justification to the character naturally.

We shot this film maintaining cold look within the camera itself so that we get similar tones at different location in different time frame.

Opening and closing tracks for the film is been originally composed, which evokes and culminate emotions of audiences as it progressively meets the climax.
