

## One In A Trillion - Escape

Written by Marven Likness

Marven is driven to write these stories as he comes to terms with his own experiences.

One In A Trillion is a futuristic drama series.

In a world where disabilities are thought to be eliminated by technology. The reality is the government forces risky medical procedures that are far from successful on disabled persons.

When procedures go wrong they remove patients from the public view. Never to be seen again.

In this episode an under ground community attempts to steal government technology capable of transporting them to a new world.
