## Logline

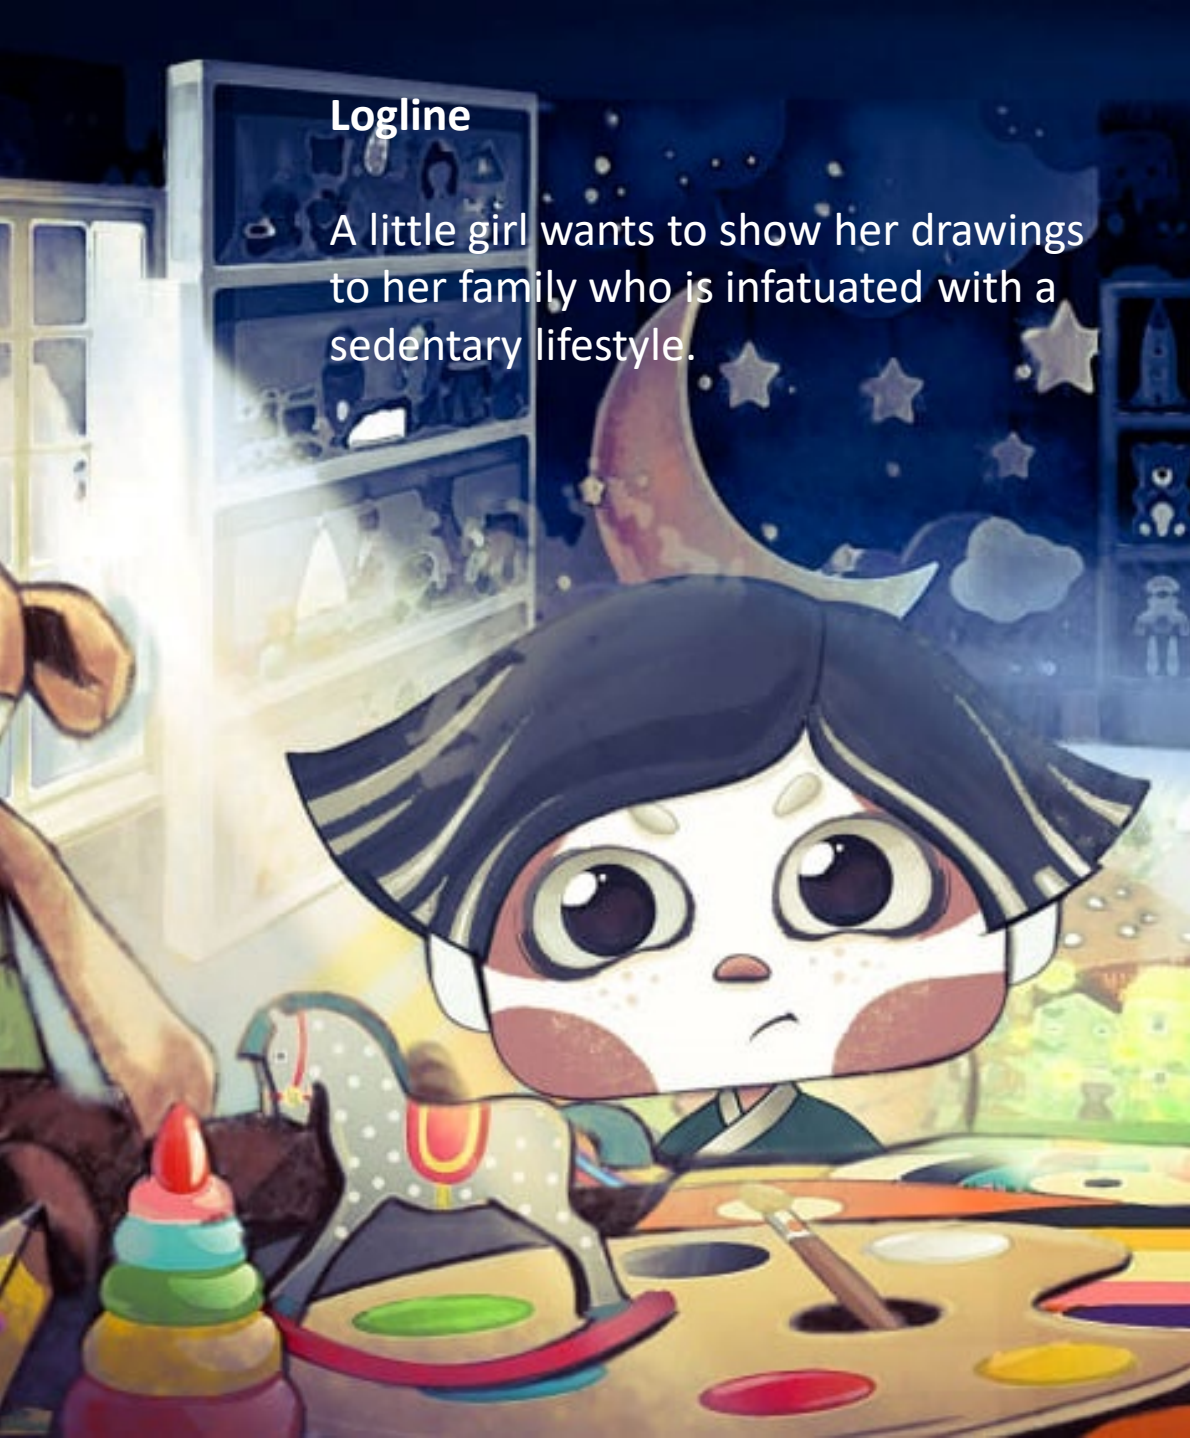

A little girl wants to show her drawings to her family who is infatuated with a sedentary lifestyle.

## SYNOPSIS

A family consist of father, mother, brother, sister, and the youngest daughter is home quarantined during the COVID-19 pandemic. There is no warm atmosphere nor live interaction within the family even though they are under one roof. Every member is doing his or her own thing; watching television, playing video games, or glued to social media on their phones. No one pays attention to the youngest member.

Suddenly, the power goes out. It upsets everybody because their activities got cut off. A loud cry of the youngest one wakes them from their limbo. They all run to the little girl. The family sit at the kitchen table and light a candle. The little girl gets excited to look at the shadows created from the candlelight and plays with them.

Power comes back and the shadows disappear from the wall. The idle and cold atmosphere is back again. The little girl is surprised to see fading shadows and turns to the table. No one is left there.

Participants 31 Chat Share Screen Record Reactions

At the HPA Tech Festival, team SHADOW shared its innovative experience of making movie remotely using the technological development at HPA Tech Festival on March 23, 2021.

P.S: It is not the World Premiere. The film itself was not screened at the HPA Tech Festival. It was technology panel discussion event and we only discussed about the innovative technology behind making the film only.
