SINOPSIS

Zodiac: Apa Bintangmu? bercerita tentang Ariel, seorang pemilik toko kaos kaki yang terancam bangkrut.

Seorang sahabat, Anggun, diam-diam mengikutkannya pada kontes vlog yang hadiahnya bisa membantu menyelesaikan masalah keuangannya. Vlog tersebut mengharuskannya berkenan dengan 12 pria dengan zodiak berbeda untuk membuktikan bahwa kecocokan asmara berdasarkan zodiak hanyalah sebuah mitos.

Siapa sangka ia akan bertemu Agi, seorang penyiar radio yang sangat mempercayai kecocokan asmara berdasarkan zodiak. Kebetulan menurut zodiak, mereka berdua tidak cocok.

Ketika Agi akhirnya memutuskan menjauh, Ariel melanjutkan proyek vlog-nya demi memenangkan hadiah utama.

Mungkin juga membuktikan kepada Agi bahwa mereka sebenarnya bisa cocok?

Atau justru menemukan bahwa kecocokan berdasarkan zodiak memang benar dan ia menemukan jodoh dari proyeknya?

SYNOPSIS

Zodiac: Apa Bintangmu? tells a story of Ariel, a sock shop's owner who was on her edge of being broke.

Her best friend, Anggun, trapped her to submit a vlog contest which prize could've helped her monetary crisis. The vlog was about her dating twelve men with different zodiac sign to prove that love compability based on zodiac sign was just a myth.

Who would've thought that she would meet and fall for Agi, a radio DJ who strongly believed in love compatibility based on zodiac signs. According to their zodiac signs, Agi and Ariel weren't a match.

While Agi finally decided to keep distance between them, Ariel continued her project to win the first prize and get out of her problem. Maybe also to prove that Agi and her could have a good relationship despite of their zodiac's incompatibility?

Or she'd find out that love compatibility based on zodiac signs was real and she would find one on her 'quest' instead?
