A desperately ill child sets out for medical treatment. A Coast Guard officer keeps watch overnight. An Iraqi becomes an American. Meet them all in a single Day...in the Life of Refugees.

Shot by more than 75 news teams in 32 countries, Greta Van Susteren narrates as Voice of America mobilizes its full network to chronicle how forced displacement affects the rich and the poor, newcomers and their hosts, those in flight, and those out to stop them.

More than two years in the making, this feature-length documentary film premiered on World Refugee Day – Sunday, June 20, 2021.
