

SHARING A FILM MAKING EXPERIENCE

This is a Bible oriented jazz music film focusing on the Book of Leviticus in the Bible. Native focus and also aspects of French Impressionist paintings are influences.

animation, showing people getting close at a church environment...the sound track is to suggest ambient movement, flow and cautious connectedness...the background of the film is real footage, of purple and ink colored waveform interpretation.... The separate individual characters in the animation are related by the togetherness of the atmosphere, and efforts are made among the characters to relate in a positive upward way, no matter how different they are as unique people. The film can show that Jesus relates to each human individually, and they can congregate to relate as well.

this episode of the KING Film Series focused on Genesis, the first half of Genesis 1:2, "The earth was without form". Even without its shape yet, the earth was the earth, since God had already made it. Identity and recognition are always possible, there is no requirement for confusion

The intent is to produce a jazz art film that is based entirely on singing from the Bible while walking through a woods. Somehow, as my camera moved through the nature area, the camera lens focused on many natural cruciform shapes in the trees, sky and water. The scenes were filmed over a period of weeks., During the film, I was shot at by satanists I did not want to encounter who used real bullets. For me this is nothing new, and the area is part of a personal struggle that has lasted a lifetime so far. I wish to regain lost property that was taken from me unfairly by harassment and I really resent those who stalk me when I go there as if I am a substance they can partake of, and do not think that anybody other than myself had any legal right to dispense away the property investment that was grabbed away from me when I was young due to gang violence and armed robbery. There was some sort of identity swap and confusion going on and I was violated by it. I wanted the property left intact. Prayers for peace. At the very end of the film, there were two separate very beautiful and rare birds that appeared as if by magic, near the water. I got them on film. Some of the real words of the Bible are sung during the initial camera work for the film and some were added later during film editing, all from the first Book Of Kings of the Holy Bible of Jesus Christ. The soundtrack was composed for this film using the Word. When the Word is spoken by a human being it always has personal aspects as well as public ones, as there is growth in faith with practice and each human is unique. There is a film trailer for this film which included photos of 11 or so of the hard and dense ceramic bullets that were shot at me, that I picked up from the ground around me during filming. As of April 23, 2019, I added the final

version of the soundtrack to the film. The footage is an artifact. I do not invite anybody to enter the original specific shooting area since it is owned privately. Maybe it should be emphasized that this artifact film is a shaker faith film due to the life story of the film's director. Journey is relevant to everyone, since it includes verses from the Bible. The Bible can correspond everywhere to everyone, in their own way. Thanks.

KING With Bears Environmental Jazz

A Jazz Film That Is focused on concepts of history, light and life and longevity for some. This film was created during August, 2016 doing a sun-dance trip. I was making the film with respect for the Earth, doing bead work that day, combining traditions in a time of stress to solve things, with guidance from Jesus. The location is Canada, and the mental historical boundaries are Ice flow trail patterns. The film is really about Paul of the Bible, and his resistance. It shows a location that is in the memory of the director from stress long ago, and memory of a brave man who died fighting against crime, yet socially the story is unresolved. The film exists as an artifact.

THE KING FILM SERIES, Episode for 10/6/2017

Prayers for peace. This video was filmed at 8 A.M. for Kata on October 6, 2017.. The text of the lyrics is derived from GENESIS 10 of the Holy Bible. It has the concepts of progeny and destiny, with faith. Like most of the KING FILM SERIES films, it has an old oriental scene box as the foreground, for various reasons, and a home-made triangle type instrument except it is two rectangular metallic shapes instead of a triangle shape with a mallet, as background., a window as farther background and the sky with the horizon as farthest visible background.

Prayers for peace. This video was filmed at 8am on May 23 and May 24, 2017. It is of a breath exercise that focuses on the Book. These 8am breath exercises are the footage for THE KING FILM SERIES. This film series is copyright liz a kennedy. This film is Official Selection for the May 1 2021 Tokyo International Short Film Festival. Most of the series is taken from ! KINGS and some are from GENESIS or ACTS, randomly opening the Book and filming, trying to make a film for one minute each day at 8am., to develop continuity to recover from stress.
