

# WHAT WILL BE HERE?

## PRESS KIT

***What Will Be Here?* is a sci-fi audio drama about living on a doomed earth and building things anyway.**

5 friends send a rocket to space with a collection of recordings on it that document the world's decline, the stories they want to tell, and their efforts in building this rocket to get their message to the stars. They wonder what their world will have become by the time their message is listened to. What will be left of a planet that has destroyed itself? What will be left of the people who lived there? What will become of their stories? *What Will Be Here?*

At its core, this show is about living and creating when things feel pointless. It's about hoping in the face of helplessness and helping in the face of hopelessness. The show finds optimism in a pessimistic view of the future. It's also about building a rocket just to see if you can.

**Launch Date:** 11.21.2021

*"What Will Be Here?" is a show whose title and characters have a deep preoccupation with the future, but its true emotional core lies in its beautiful examination of the present.* - Tau Zaman
