

Lightwaves Soundwaves

by Dwayne Jahn

Sanity. Stability. Equanimity. Balance.

Supramundanity. Reality. Make-believe.

Atoms, lightwaves, soundwaves, heat energy,
electricity, gravity, magnetism -
or the lack thereof.

All is empty of thingness.

The relaxation proclamation.

Transcending cause and effect.

Post-contemporary-new-age.

I must be on the far side of the zoom,
on the other other side.

Intricate neurochemistry.

Metaphorical luminosity.

Play of spiritual energies.

An unchanging core.

Disillusionment.

Inner art and celebration.

Friendly reminders.
