Logline and Synopsis

Dice Tower Theatre presents Dawn of Dragons by Mike Atchley

LOGLINE: Young heroes bound in love and kinship are forced on a quest to discover the truth behind the magic of dragons, and seek those that stole it before their world itself is destroyed by the growing power of the Dark Army.

Originally created simply to record the events of a collaborative roleplaying game, it grew into a place where the players could discover themselves in a world where dragons speak, magic lives and wishes come true.

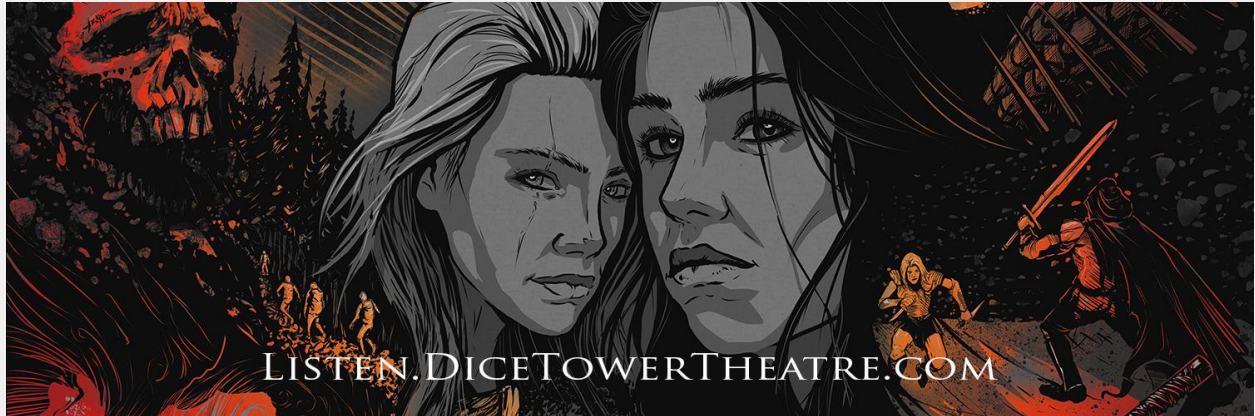

Raised by former knights in hiding, they have grown up taking on different skills, each one unique and valuable to each other. Not only bonded by use of magic or mastery of a sword, they are also tied to a great destiny - a destiny foretold in lost tomes they have yet to discover. Their world is cloaked in a great shadow that is spreading like a sickness which they seek to overcome.

When their home town of OallEnAkhan is destroyed, Young Cordelia the fire mage, aspiring knight Benedict, bright-eyed mariner Zorin and the deadly swordmaster Sophie fall under the tutelage of Elloveve Hawkligh, a secretive yet legendary elven scout archer. Destroyed by the local Justice, Lord Pallus (Zorin's father), his Dark Army grows increasingly more powerful with the addition of a cruel dark cleric serving an evil queen of death along with her legions of dragons.

Finding themselves a decade older, but escaping the ashes of yet another lost home, they set out to find passage across the great sea to the Ivory Library. Seeking knowledge within its infinite halls guarded by the ancient order of Stone Monks, Cordelia finds the answer. They must find the dragons of virtue and seek their help to turn the tide. All knowledge has its price though, and Cordelia must pay for it by recording her own story, while reliving the worst night of her life all over again.

This is what takes place in just the first of four seasons (currently) of this clean, family-friendly, fantasy epic. Originally created simply to record the events of a collaborative roleplaying game, it has now grown to a production including over 80 voice actors, original scoring and sound design by the game master himself, resulting in 12 hours of quality entertainment. Many of the echoes of life's struggles came out organically at the table between the players as friends and were captured in the story. Those struggles come with lessons,

...and overall those lessons are to be a better person, both to those around them as well as themselves.

Sample Listener Reviews

Voice and story perfectly matched

★★★★★

“Excellent narration that focuses on the story over the mechanics and side chatter that bogs down so many table top podcasts”

onionknightX via Apple Podcasts · United States of America · 09/11/19

High quality actual play

★★★★★

“This show is so well produced it's insane. It's a joy to listen to and I look forward to being a fan for a very very long time.”

kiwinerdyboy via Apple Podcasts · New Zealand · 08/22/19

Exceptional Story! Incredible Narration!

★★★★★

“If you're looking for that next thing and love RPG style settings but also prefer the story over dice rolling ... then this is your thing. Wow ... what an ensemble - narration is superb - really well produced. And great for all ages!”

HappyGoLucky via Apple Podcasts · United States of America · 08/13/19
