

## Can music heal?

The documentary, **We Thrive**, demonstrates that all of us can go beyond the struggles and tragedies of our lives, and the often tragic history of our ancestors, to THRIVE via music. **Lisa Hagopian** and **Eric Harabadian** of [Vision 561 Productions LLC](#) demonstrate this in their third documentary feature film, **We Thrive**, with an eclectic mix of musicians who share a common bond

Armenian American's ethnic history is a tale of genocide, struggle, survival and ultimately renewal. The featured Armenian American musicians answer the question "Can music heal?"

***We rise up to create and thrive!***

**We Thrive** is a film that appeals to audiences of any ethnicity or background. This story is told through conversations with prominent musicians, archival footage and photographs and live performances.

**We Thrive** is entering the film festival circuit spring - fall 2023 with a public release in late 2023. Our ongoing fundraising campaign can be found at [GoFundMe](#).
