

Heart to Heart

The project

The project “Heart to Heart”, was born in January 2023, after another year in which I saw friends fall and many others have big health problems

World is in a real global transformation and we, have no shooter to stop this alteration of our life. This is really weird because we are billions, and the people who want to gain power are really a small group of lawbreaker.

Too small number of Artists, tried to fight all this. They try to warn the world about what is happening. But their voices got lost in the screams of those who tried to drown the truth

“Heart to Heart” is a mix of love, screams, voices, notes and chords, which I hope will unite, millions of people, who every day fight this criminal transformation of our lives, making us all feel less alone.

We are billions and we must be brave and fight for Humanity. If we lose this fight, we will lose the future for our children. We will lose better future for our planet.

No one will fight for us. No one will come to save us.

We ourselves must fight to defeat those who want to lead, above all and all. Who wants to enslave us, who wants to bury the history of our planet.

Remember we are billions
