Tone

It is a romantic comedy, fresh and modern, which is based on friendly and endearing characters, but without hiding its defects. It is a film that tries to treat women and men equally, that wants to reflect on how complex it is to maintain a relationship in these times and review the issue of relationships with a lot of age difference and dissimilar generations. The film seeks to be festive and reflective in the right proportion. Through hilarious situations, ingenious and provocative dialogues, and an optimistic outlook on life.
