

SHORT FILMS

Hi, I'm A PRAKASH, a filmmaker, music composer, and Co - founder of **KSPK Productions, Animate Studios AV, and Darkstar Music Group** based in Malaysia. I've been involved in the film and music industry since 2002, working with a wide range of artists and genres. I'm also a registered composer with **MACP Malaysia**.

In 2023, I began exploring the use of artificial intelligence in my creative process. That journey led me to create "**Mogaasalai**", the first **100% AI-generated Tamil music video**, which I composed myself. The lyrics were written and performed by my wife, **Kodthay**. It was a personal and creative breakthrough that gave me the confidence to push further into AI-driven storytelling.

Following that, I released:

"**En Anbe A.I**" – the first Tamil love song fully generated with AI

"**Selamanya A.I**" – the first Malay AI-generated music video

"**Intro**" and "**Pogathe**" – experiments blending traditional techniques with AI visuals and vocals

In 2025, I wrote and directed "**Dreams**", the **first Tamil AI short film**. It tells the inspiring story of a young woman who dreams of becoming an astronaut, but her life takes a detour after marriage, until her supportive husband and in-laws encourage her to pursue her dreams. The film received positive responses for its unique blend of emotion, culture, and technology.

Most recently, I created "**Raja Kumari**", an AI musical short film released on Mother's Day 2025. It's an emotional story about a little girl and the unconditional love she has for her mother, even in the face of tragedy.

My goal is to keep pushing creative boundaries with AI, telling stories that matter, and hopefully I can direct a feature film that combines heart, heritage, and high-tech innovation.

MUSIC VIDEO'S

My Vision

I'm on a journey to create a **feature film that embodies creativity at its highest level**, a work that blends emotion, culture, and technology into something timeless and universal. With every short film and music video I've made, I've been building toward that vision: not just to tell stories, but to **craft experiences that move people**, challenge norms, and break boundaries.

My dream is not only to direct a feature film, but to be **recognized globally as a bold and visionary creative director**, someone who dares to imagine differently, and brings ideas to life with heart and innovation. I believe storytelling is one of the most powerful tools we have to connect humanity, and I want my films to inspire, to heal, and to leave a mark long after the screen fades to black.

As a Director in using AI to tell deeply human stories, I don't see technology as a replacement for creativity, but as a new paintbrush in the hands of the artist. I want to use every tool available, from traditional cinematography to the latest in AI and digital production to **create something the world has never seen before**.

This is just the beginning. I'm ready to give everything I have to reach that dream.

A PRAKASH – DIRECTOR - EDITOR - COMPOSER

LOGLINE – DREAMS

A young woman dreams of becoming an astronaut but tradition, marriage, and societal expectations stand in her way. With support from her husband, she defies the odds to reach for the stars.

SYNOPSIS – DREAMS

"*Dreams*" is the first AI-generated Tamil short film, blending heartfelt South Asian storytelling with cutting-edge artificial intelligence tools.

Set in a Forest, the story follows a brilliant student with aspirations of becoming an astronaut. But when her parents arrange her marriage, her future seems locked in domesticity. To her surprise, her husband and in-laws become her biggest supporters, reigniting her pursuit of space.

The film explores themes of **female empowerment, tradition, ambition**, and how **love can fuel progress** all brought to life through AI-generated visuals, music, and scripting.

LOGLINE – RAJA KUMARI

An emotional AI-generated musical short film that celebrates the strength, sacrifice, and unconditional love of mothers and fathers, told through the voice of a child who sees his mother as his queen.

SYNOPSIS– RAJA KUMARI

"*Raja Kumari*" is an AI-generated musical short film that pays heartfelt tribute to the strength and love of mothers. Told from the perspective of a child who sees her mother and father as her strength, the film blends soulful Tamil lyrics with emotionally charged visuals created entirely using artificial intelligence (A.I)

Through symbolic imagery and a moving soundtrack, *Raja Kumari* captures the everyday sacrifices, quiet strength, and enduring love of mothers, especially in South Asian culture. It is a celebration of maternal devotion, brought to life through modern tools but rooted in timeless emotion. Released on **Mother's Day 2025**, the film is both a personal homage and a cultural statement showing how AI can honor human connection in the most intimate way.

WHAT MAKES THEM UNIQUE

- **First-ever Tamil AI Short Film**
- Entirely AI-generated visuals (Kling AI), music & vocals (TopMediaAI), and story structure (ChatGPT), narration Eleven Labs
- Edited using Filmora 13 on a basic home setup.
- Produced in Malaysia by a South Asian filmmaker highlighting **Tamil culture with futuristic tools**.

DIRECTOR'S STATEMENT – A PRAKASH

“Dreams” and “Raja Kumari” is more than a film, it's a statement. I wanted to prove that with imagination and AI, a single creator can tell powerful, culturally rich stories. My goal is to bring underrepresented voices into the future of cinema, without waiting for permission or big budgets. AI helped me do that. And this is just the beginning.”

AI TOOLS USED

- **Kling AI** – Cinematic scene generation
- **TopMediaAI** – Music composition & vocal generation
- **ChatGPT** – Script and dialogue writing
- **Eleven Labs**- Narration
- **Filmora 13** – Video editing

FESTIVAL SUBMISSIONS

“Dreams” and “Raja Kumari” is currently available on **FilmFreeway** and has already been officially selected by the following festivals:

- **FerFILM International Film Festival (Kosovo)**
- **First-Time Filmmaker Sessions Volume 5** (Lift-Off Global Network, Pinewood Studios)

More international and AI-focused festivals are being targeted as the film gains recognition.
