

# Winged Hearts

One song. One gaze. One chance to  
begin again.

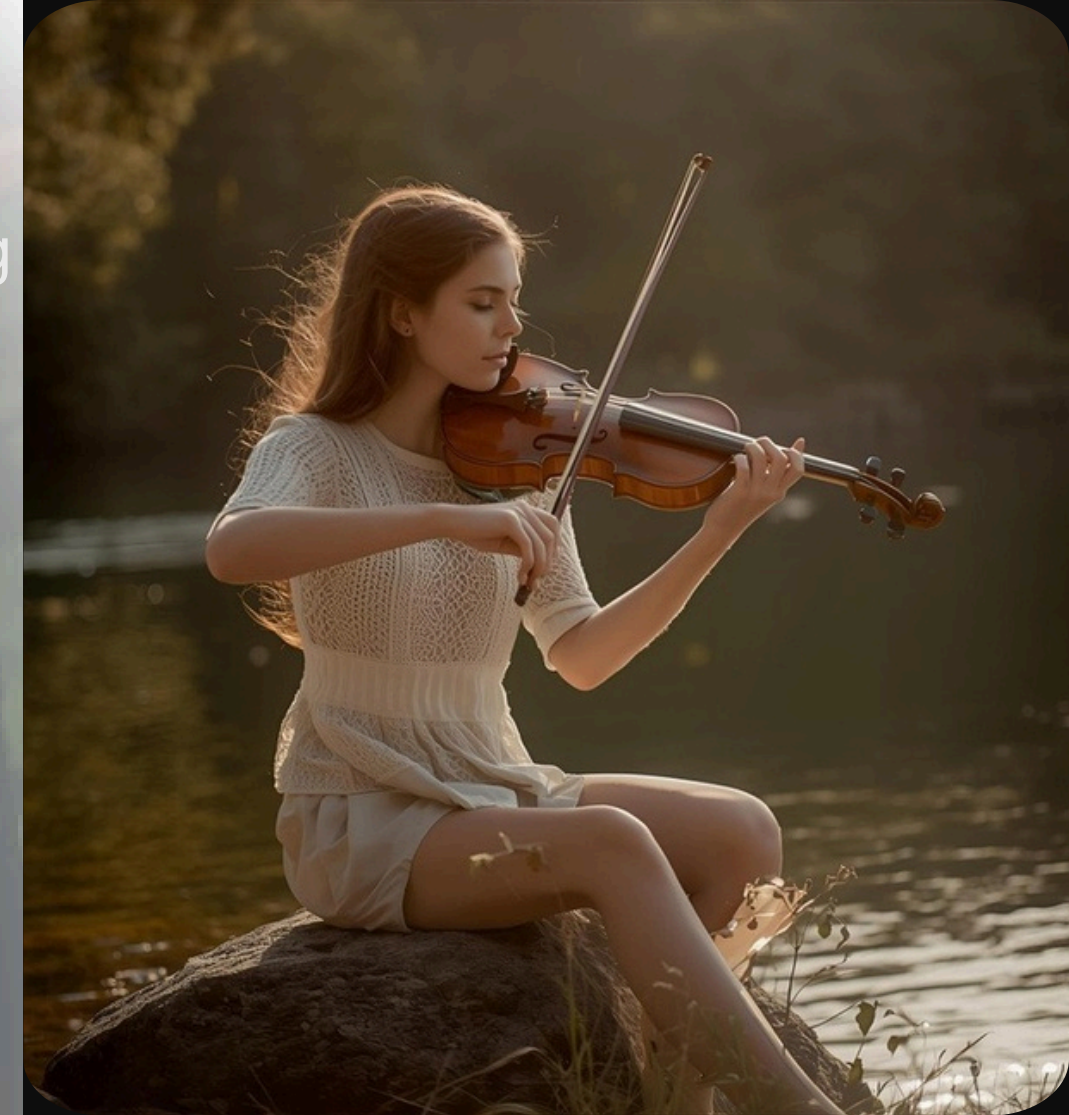

A virtuosic violinist crippled by a career-altering accident and a fallen country music star battling addiction find unexpected healing and inspiration in each other while recovering in a secluded mountain town.

*Winged Hearts* is a story of transformation through adversity, with themes of resilience, reinvention, and the quiet power of presence. It's a cinematic meditation on what it means to start over—and how healing another soul, human or wild, can lead us back to our own. It pulses with resilience through reinvention, where healing is not the end goal but the doorway to becoming someone new.

*A note about the hawk - The hawk is a real character, I named "Red", who decided it needed human companionship for a while, and I was nursing a broken wrist.*

*The script includes three original music scores, "I Wanna Have Wings", "Run the River Wild", and "Fallin' Cause You Said Goodbye".*

*In a world where dreams and struggles collide, renowned violinist Clara Matensin and troubled singer-songwriter Brook Drendon embark on a transformative journey of recovery, connection, and self-discovery.*

*As Clara prepares for a pivotal performance, disaster strikes when an overhead light fixture falls, injuring her hand. This incident leads her to confront her fears and frustrations while she grapples with her identity and artistic aspirations. Meanwhile, Brook battles his alcoholism and dwindling career, facing the consequences of his actions while striving to reclaim his purpose in music.*

*After a series of setbacks, he finds hope and support in the form of his loyal manager Jax and a serene retreat at Tamecoya Pines, where he can focus on healing. As fate intertwines their paths at the Royal Mill Inn, Clara and Brook discover a shared understanding of trauma and the challenges of artistic expression.*

*Through their fragile yet deepening connection, they push each other towards rehabilitation, both physically and emotionally. Clara's struggle to play her violin again with the help of a brace mirrors Brook's quest for sobriety, as they learn to support one another amidst vulnerability and triumphs. Through a series of poignant performances and personal breakthroughs, Clara, accepting her limitations and the brace, gradually reclaims her musical voice, while Brook faces his demons head-on, finally finding solace in collaboration.*

*Their journey culminates in a powerful duet at the Nashville Concert Theater, where they blend their music, explore themes of resilience and acceptance, while capturing the hearts of their audience and each other. Ultimately, "Winged Hearts" is a story of two artists learning that pain can lead to transformation, and through the shared power of music, they find not just healing—but also love, friendship, and renewed purpose in their lives.*

# The Song

"I Wanna Have Wings" is an emotionally resonant track that anchors Clara and Brook's journey from isolation to connection. Brook's soulful vocals and guitar blend seamlessly with Clara's haunting violin, creating a signature sound that's intimate, cinematic, and unforgettable. The song embodies the film's core theme: transform through adversity.
