**NEW JOURNEYS** is a music video conceived as a visual extension of the album of the same name. The project explores artistic transition, introspection, and emotional evolution through a carefully constructed visual atmosphere.

Rather than presenting a literal narrative, the piece suggests movement and transformation through subtle imagery, allowing the music to remain at the center of the experience. The visual language remains intimate and restrained, supporting the emotional depth of the performance.

# ▶ DIRECTOR'S STATEMENT

With **NEW JOURNEYS**, the intention was to translate an inner musical journey into a visual language that feels honest and atmospheric. The imagery emerged naturally from the emotional landscape of the music, creating a dialogue between sound and visual space.

This project represents a conscious step toward integrating musical expression with visual storytelling while maintaining authenticity and artistic coherence.
