What the audience said

2 comments from people who watched your film during the event. Shared anonymously, in their own words.

The theme was great

great cast of actors

What came through

The theme clearly connected. Audiences singled it out as a strength, which means the idea at the heart of your film is reaching people.

Your cast drew real praise too. People felt the performances were strong, and that's a hard thing to get right early on.

WHERE TO FOCUS NEXT

Thanks for putting your film in front of this audience and being part of the process. Feedback is one of the few real chances to see your work through fresh eyes, and we hope these notes are useful.

Build on that by making sure the theme is carried by what your characters do and decide, not stated for them in dialogue. A common trap at this stage is having a character say the meaning out loud, which can flatten a moment that the performances could have carried on their own. Trust your actors to

dramatise the idea through choices and reactions, and let the audience arrive at the theme themselves.

Above all, keep making films. If you carry just one idea from this into your next project, that's a win. Momentum is the thing that matters most here, so let this push you straight into whatever you make next.
